

Computer Audio Design 1543 DAC

Apple Driver Installation

Version 1.0

July 2012

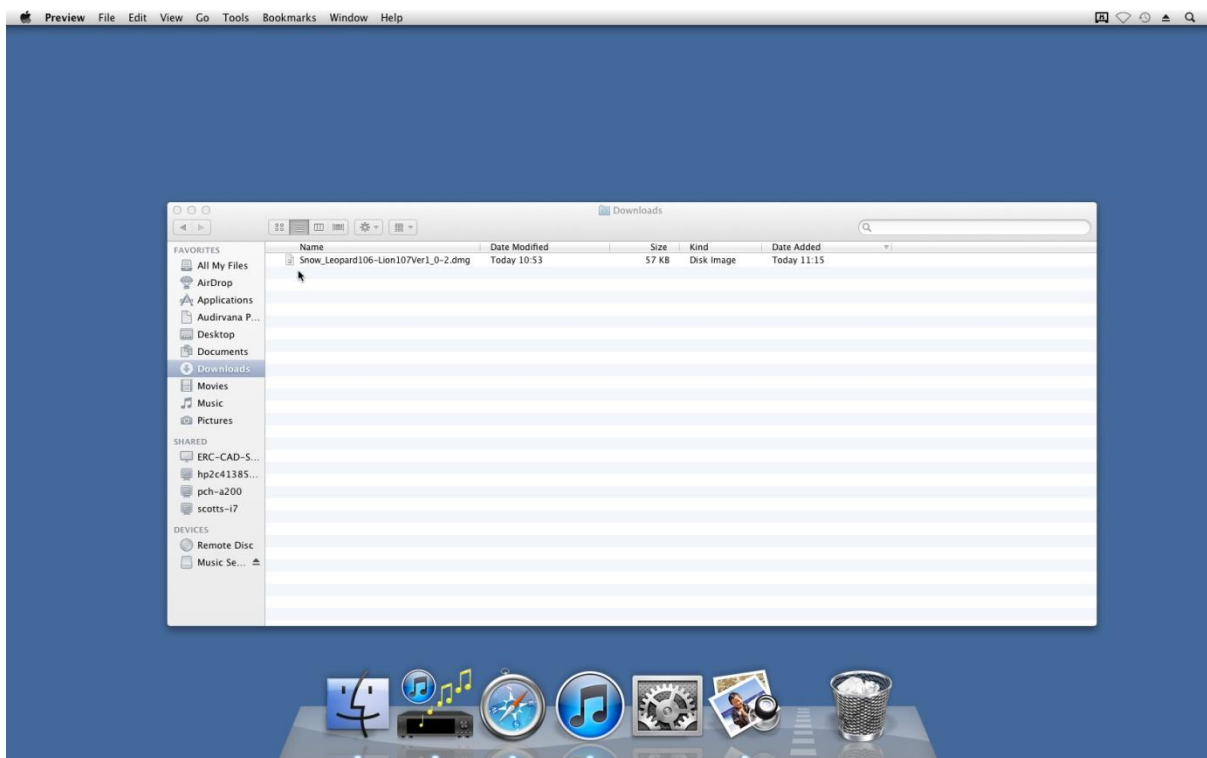

1.0) Apple Mac OSX Driver Installation

This paper will use Mac OSX Lion 10.7.2. These following instructions are extremely detailed for those that may not be comfortable installing a driver.

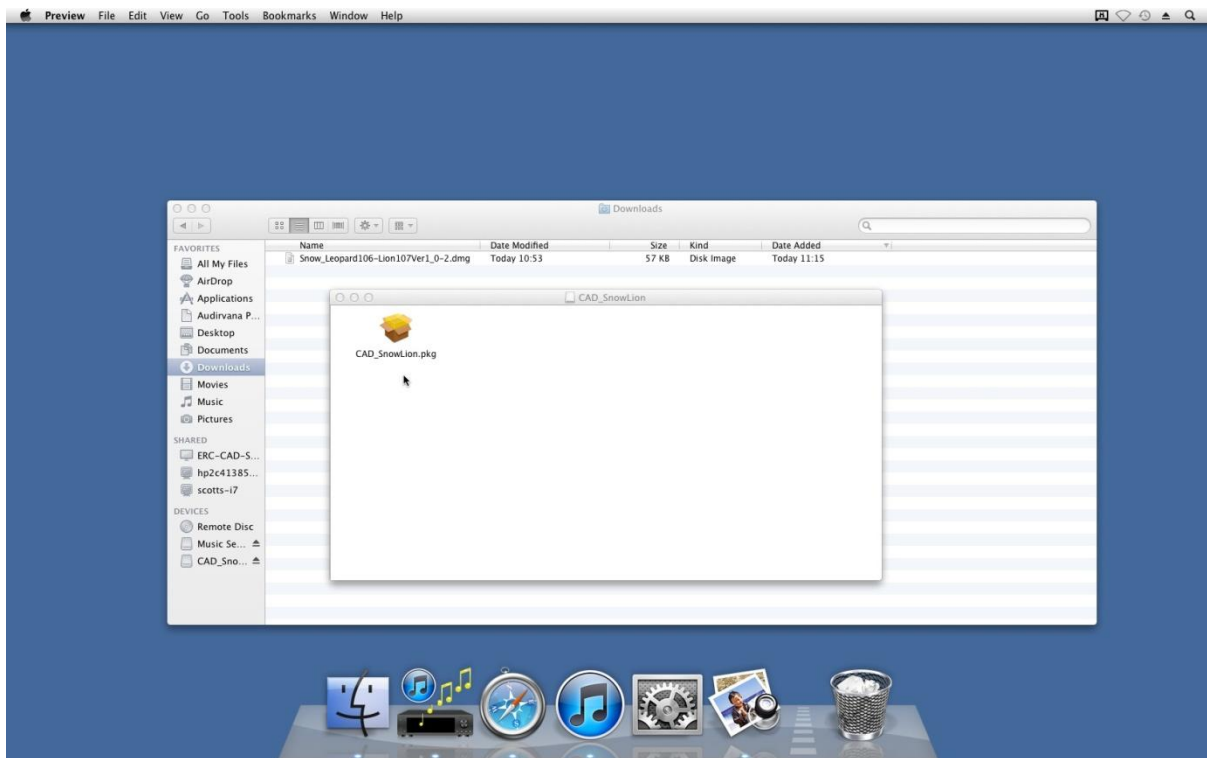

First you must download the correct driver for your operating system. Please go to:

<http://www.computeraudiodesign.com/downloads>

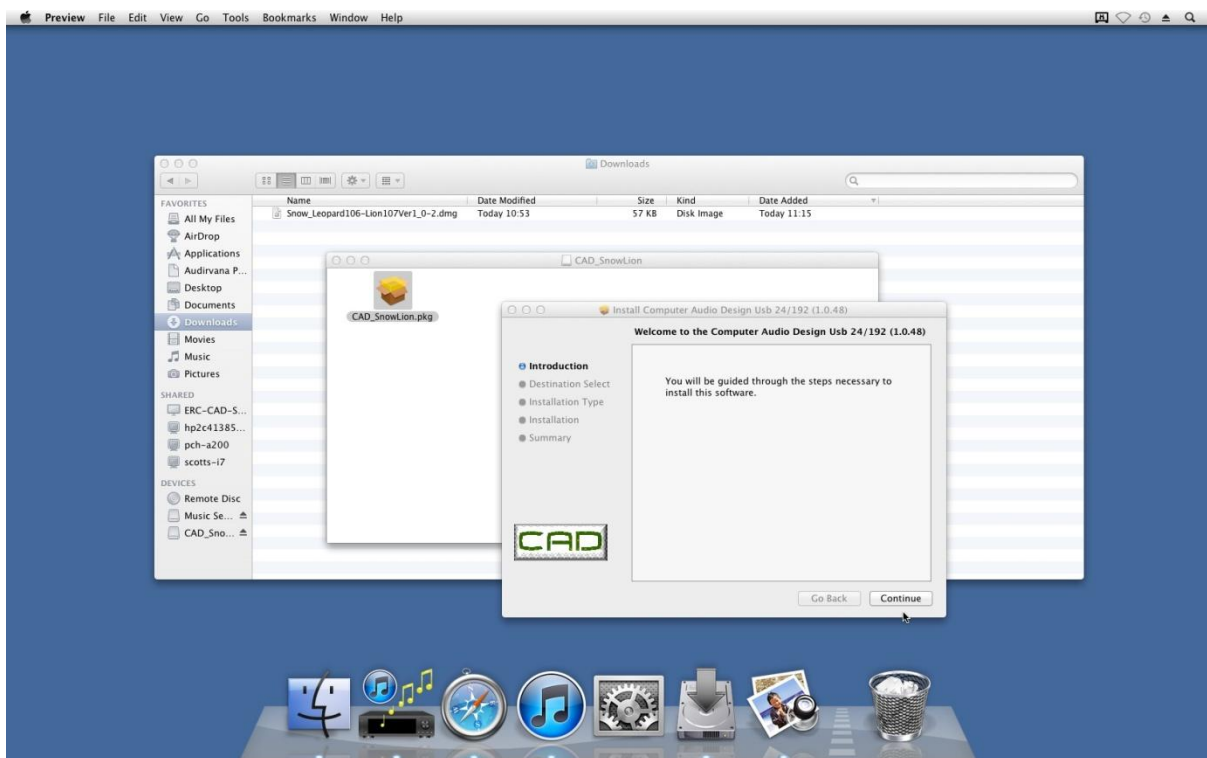

and download the correct driver for your operating system. The driver should now be in your Downloads directory:

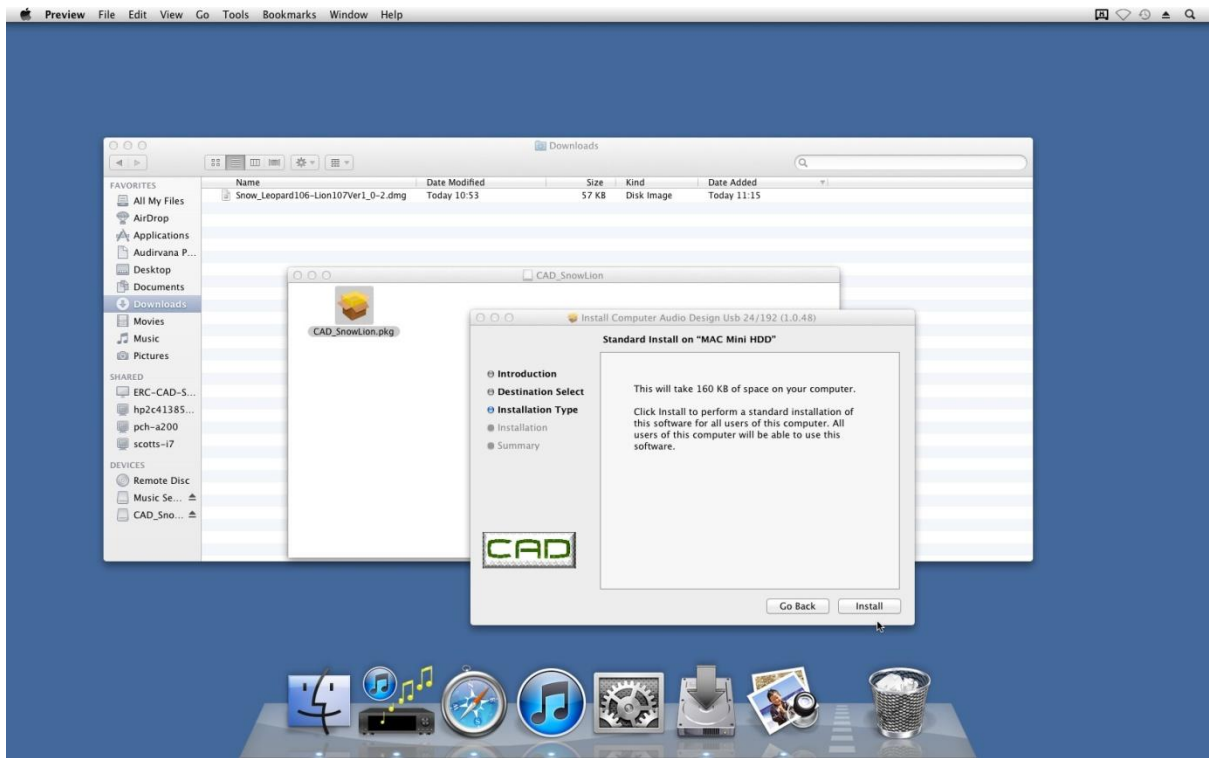

Now double click the driver and you will see this:

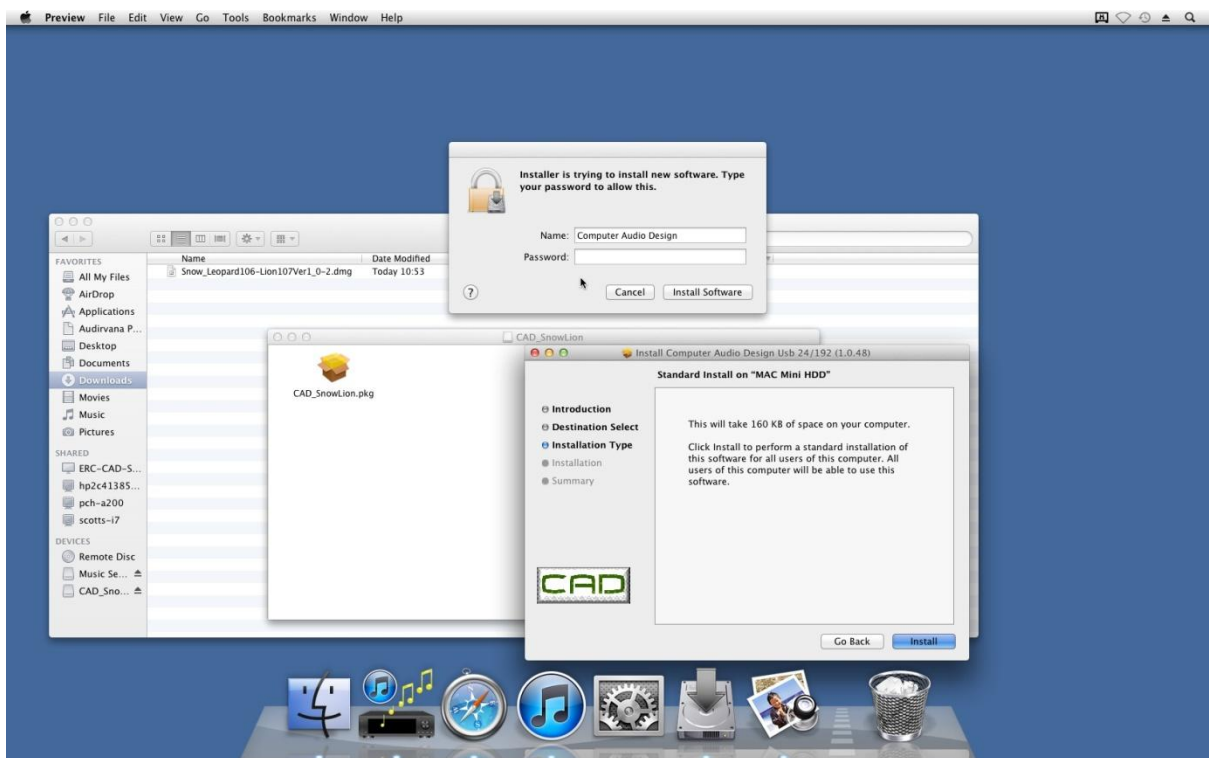

Now Double click the "CAD _XXXX driver.pkg". You will now see the Computer Audio Design Driver installation software:

Now click the Continue button and you will see this screen:

Now click "install". Depending on your security setup you may or may not be asked for a password to install the Computer Audio Design Driver:

Enter your password if necessary and click "Install". The driver may take up to 2 minutes to install. You will then see this:

Click on "Close" and your Computer Audio design driver is now installed.

You never need to do this again on this computer. If you want to use another computer with your CAD 1543 DAC you will have to install the correct driver on that computer.
